INTRODUCTION

Reflective journal

Reflection has been defined as a process regarding thinking about and exploring an issue of concern, which is triggered by an experience. As a student teacher, every B. Ed student has to familiarise themselves with writing reflective journal, not as a formality but as a responsibility. As every individual progress through their education, they must practice, enhance, and habitually use their reflection skills. Reflection can happen in various methods. Journal writing is a way of reflection promoted by experienced teacher educators in bringing the best out of the student teachers.

Journal writing refers to any writing that a student teacher performs during either a clinical or classroom experience that challenges them to reflect on past situations, as well as consider how they might perform differently should similar situations arises in the future. An expert practitioner and a new comer can be distinguished by their performance alone. An expert practitioner experiments on the spot with previous data or engages in what is called 'Reflection-in-action'. It occurs when an individual reshapes what he or she is doing while doing it. Teachers or who do not possess an array of previous experiences from which to draw, are not able to reflect-in-action as can skilled practitioners.

Reflecting on their actions, their behaviour, their knowledge level in every lesson, can help student teachers in finding their advantages as well as their weak points. While reflecting, a student teacher is becoming an evaluator and a critique himself or herself and is comparing their performance with their own past. With time, through reflection, every student teacher will be able to find a better version of themselves, as a teacher. This is where reflection has an importance.

Name of the Student Teacher: Simna N P	
Optional Subject: Social science	
Name of the School: G H S S Irikkur	Lesson Plan No:1
Class : 8 th H	Subject: social science
Date: 07/10/2022	Topic : MAPS- INTRODUCTION
1. Preparedness for the class	PPt and pictures related to maps was prepared
Date and time of pre-lesson Discussion	07/10/2022
Comments/Suggestions by supervising teacher	Suggested me to introduce myself to them before lesson since she hasn't informed them about me.
2. How the class was conducted?	Class was conducted in constructivist method using activities, in the presence of concerned teacher.
3. How learners responded?	Mass responding was present in the few minutes of class and later I strictly told them that response should be made by only those who are asked to. Later on they responded individually.
4. The responses to the learners Questions	I gave them appropriate clarifications to the doubts asked by the students
5. The capacity to include learners sharing of their Experience	
6. The responses towards learner's errors	The spelling mistakes made by the learners while answering the questions were corrected.
7. Difficulties in comprehending new ideas and concepts	The students do not show any difficulties in comprehending new ideas and concepts
8. Issues of discipline	Discipline was disrupted in between the activities but the learners became quite when the teacher asked them to do so.
9. Organization and management of group/individual activities	The teacher gave an individual task and group activities to the children. Both activities were smoothly executed.
10. Time management	The lesson was completed within the time limit.
Date and time of post-lesson discussion:	On 10/10/2022 at
Comments/Suggestions by supervising/optional teacher	Suggested me to give them brief notes.
