## INTRODUCTION

Like all other professional programmes, field engagement is an essential component of any teacher education programme. In the case of teacher education programmes, field engagement involves engagement with the students and teachers in school. The sustained engagement with the school over a period of time is known as 'school internship' which equips the prospective teacher to build a repertoire of professional understanding, competencies, skills and positive attitude to schooling and teaching. Internship programme in teacher education is of great significance because it ensures the professional preparation of prospective teachers. It provides them a practical opportunity to develop true understanding of the teaching profession and future prospects of working conditions in that profession.

According to the revised B.Ed curriculum, duration of the internship programme is decided as three month. Duration of my internship was 1<sup>st</sup> October to 23<sup>rd</sup> December 2022. I completed my practice teaching at GHSS Irikkur. During this period, I had completed 60 lesson plans and involved all the curricular and co-curricular activities conducted in school.

## INTRODUCTION

Like all other professional programmes, field engagement is an essential component of any teacher education programme. In the case of teacher education programmes, field engagement involves engagement with the students and teachers in school. The sustained engagement with the school over a period of time is known as 'school internship' which equips the prospective teacher to build a repertoire of professional understanding, competencies, skills and positive attitude to schooling and teaching. Internship programme in teacher education is of great significance because it ensures the professional preparation of prospective teachers. It provides them with a practical opportunity to develop a true understanding of the teaching profession and the prospects of working conditions in that profession.

According to the revised B.Ed. curriculum, the duration of the internship programme is decided as three months. The duration of my internship was from 1 October to 31 December 2022. I completed my practice teaching at GHSS Sreekandapuram. During this period, I completed 60 lesson plans and involved in all the curricular and co-curricular activities conducted in the school. The training was mainly conducted in High School (Class 8 and 9) and Higher Secondary (Plus One) sessions. Sreekandapuram Government Higher Secondary School has been ranked best in the list of government schools in Kerala. This school is different from other schools in terms of high-quality infrastructure, use of information and communication technology and other modern facilities, good results in SSLC and Plus Two exams, good performance in arts, sports, science fairs etc. The relationship between teachers and students was also different from other schools

## INTRODUCTION

Internship program in Teacher Education is of great significance because it ensures the professional preparation of prospective teachers. It provides them a practical opportunity to develop true understanding of the teaching profession and future prospects of working conditions in that profession. The internship programme provides the student-teacher with ample opportunities to experience and participate in all the school activities as a regular teacher including planning, teaching and assessment, interacting with school teachers, community members and children. In fact, it is clearly stated in the Kannur university B.Ed. syllabus that the internship period should not be reduced for the 'delivery' of a certain number of lesson plans, but should aim at meaningful and holistic engagement with learners and the school. Thus a record of the activities engaged by the student teachers is being maintained.

Duration of my internship was 7<sup>th</sup> August 2023 to 8<sup>th</sup> November 2023 . I completed my practice teaching at G.H.S.S . Sreekandapuram .The internship period consists of around 60 number of working days spread across around 13 weeks. In this 13 weeks, 10 weeks were spent at high school and 3 weeks were spent at higher secondary. As part of the university norm, I completed 60 lesson plans and engaged in different range of activities during this 13 weeks of internship and became familiarised with different dimension of a school.
