POLICY

Area: Environment

Policy no: POL013/EP/PKM/2019

Title: Policy for Energy Conservation

Policy owner: Principal

POLICY STATEMENT

Our policy aims to reduce energy consumption through efficient practices and technological advancements. This policy will help the institution to navigate and develop an environmentally sustainable and economically feasible campus that will reflect our core values of engagement and accountability

OBJECTIVES

- ❖ Not to consume energy but to conserve energy
- ❖ Reduce overall energy consumption: Implement strategies to decrease energy usage in the institution.
- ❖ Promote energy efficient technologies: Invest in and adopt technologies that enhance energy efficiency in equipment, system and process.
- ❖ Raise awareness: Conduct awareness programs to educate staff and students teachers of the college as well as the public about energy conservation practices and encourage their active participation.
- ❖ Government sponsored programmes and projects
- ❖ Make students as EMC resource persons.
- ❖ Foster a culture of conservation: Encourage a culture that prioritises energy conservation in daily activities and decision-making process.

ROLES AND RESPONSIBILITIES

- ❖ This policy will be imparted to all students, teaching and non-teaching staff of P.K.M. College of Education.
- ❖ All newly admitted students will be informed of the policies and rules regarding the energy conservation during the Student Induction Programme.
- ❖ Conduct regular energy audits to identify areas for improvement and track progress in reducing energy consumption.
- ❖ Establish a routine maintenance schedule for all equipment to ensure optimal efficiency and longevity.
- ❖ Displaying energy consumption quotes in the campus

POLICIES ADOPTED

- ❖ Conduct regular energy audits to monitor energy consumption.
- ❖ Conducting different programs such as rally and awareness classes for the public under the banner of 'URJAKIRAN', a venture of the State Govt. in association with EMC.
- ❖ Integrate renewable energy sources like solar panel to supplement traditional energy sources and reduce reliance on Non-renewable energy.
- ❖ Personal computers, other office equipments and air conditioners should be turned off when not in use.
- ❖ All new renovations and construction to be designed to minimise energy use with high efficiency lighting and minimum incandescent lighting.
- ❖ Encouraging the student teachers to take part in energy conservation programmes such as EMC training for resources person.
